PERSONAL STATEMENT

Front-End Developer with teaching and customer-service experience who strives in crafting clean code for beautiful web and mobile applications. I'm a creative driven person that seeks a challenge and has the ability to quickly assimilate new technologies. Seeking an agile environment with a highly collaborative team.

Through customer-service experience in the retail, restaurant, and hotel industries I've strengthened my communication and interpersonal skills making me a valuable asset who can effectively engage with clientele or team members. When working in teams I value communication, growth, and organization.

SKILLS

HTML5 | CSS3 | JavaScript ES5/ES6 | jQuery | React | Vue

React Native | Sass | UX/UI Design | Sketch | Wireframing

Webpack Configuration | Chrome DevTools | Git/Github

Responsive Design | Flexbox | Test Driven Development

PROJECTS

Style Guides | Solo project

Responsive and reusable style guides for a navigation bar, content cards, accordion tab and footer

- Tools: HTML | Sass | jQuery
- <https://github.com/swanie21/style-guides>
- <http://kirstenswanson.io/style-guides/>

Birthday Tracker | Solo project

Mobile application with native iOS features that stores your close family and friends' birthdays in a Firebase database

- Tools: React Native | Firebase | HTML | Sass
- <https://github.com/swanie21/birthday-tracker>

Mac OS Desktop Background Changer | Pair project

Electron desktop application that fetches images from the Unsplash API and sets that image as the desktop background on a Mac

- Tools: Electron | Vue | localStorage | AppleScript | Sass
- <https://github.com/swanie21/change-of-scenery>

Chat Application | Pair project

Chat application that authorizes login through Google allowing users to send persistent messages to each other

- Tools: React | Firebase | HTML | Sass
- <https://github.com/swanie21/shoot-the-breeze>
- <https://shoot-the-breeze-99d6f.firebaseio.com>

Weather Forecast Application | Group project

Weather forecast application that fetches data from the OpenWeatherMap and Geolocation APIs to display current weather and allows users to select forecasts of three cities

- Tools: React/Router/Redux | API Fetching | HTML | Sass
- <https://github.com/07nguyenpaul/weather-forecast>
